NC1

NC1 is a two-component product, which could be easily recognized by its milky color. Before working, the product should be shaken. Cans and bottles to be shaken well before using as well. nc1 easily cleans and seals surfaces, leaving a thin wax coating.

NC1 OBJECTS FOR CLEANING

NC1 is a liquid biodegradable detergent, which is used on small surfaces using the spray pump.

Polished interior surfaces, corridors, door areas, and stairways can easily be clean to shine with NC1 and two microfiber towels. There is no need for water usage. Spray the amount on the surface and use one microfiber cloth, moving it in the same direction, and the other one used for polishing. that is how easy it is!

It is an easy and fast process that can as well remove fingerprints and other spots. Alternatively, NC1 can be used on larger surfaces using a foam sprayer for cleaning with the unique system of Nobelclean. As an example before, you can spray the foam, clean it with a damp sponge, wipe it with a microfiber cloth, or just flush with clean water. Caution -- make sure to polish the surface with a microfiber cloth after applying NC; otherwise, you may discover spots.

NC1 OUTER SURFACES, HULL, ETC.

In this case, NC1 is used as a foam. Sprayed on the surface and after that cleaned by using the cleaning system of Nobelclean and then washed with pure water, and that is it! You can use NC1 in the sun, but surfaces should be washed or polished immediately with a microfiber cloth after usage.

MEGAYACHTS

MIRRORS, WINDOWS

NC1 may as well be very well applied to the interior, glass, and mirror surfaces. Just spray the amount and wipe the dirt with a microfiber cloth, and polish with the second towel, and it is ready! Even lifts or various other surfaces can be cleaned as well. NC1 cannot be used for upholstery, leather, or carpets!

BUSINESS JETS

NC 1 FOR WORK DESKS

NC1 works great on the workspaces of the boat. With a small pump, you can spray amount and afterward wipe the dust in one direction with one of the towels and polish with the other towel, and voila!

LUXURY CARS

NC1 IN THE ENGINE COMPARTMENT

NC1 cleans and gives a great glow on products of stainless steel. And again, it is as simple as that, spray, wipe off the dust, and polish with the second towel and it shines amazingly!

GENERAL INFORMATION FOR NC1

NC1 may be used on all lacquered surfaces and glass stainless steel, mirror, or other glossy surfaces.

Please, after using NC1 in direct sunlight, make sure to immediately polish the surface or spots that can occur.

Please note that while using NC1 on all interior surfaces, you must use only with the showed special microfiber towel with the small squares.
